SERVICES

1

STRUCTURAL ENGINEERING

Our structural engineers are trained to collaborate intimately with the design team & the client in order to innovate in the context of the end-user's needs. We work with various Contractors in exploring and determining efficient construction methodologies to produce safe, cost-effective solutions.

We adhere strictly to the requirements of relevant International Building Codes and KS&P utilizes virtual building modelling software in order to ensure safe building design and construction.

SERVICES

2

CIVIL ENGINEERING

Civil Engineering relates to the design and construction of the built environment around us. It is about roads, bridges, railways, drainage systems, retaining structures, coastal protective structures, slope stabilisation, electrical infrastructure and sewerage works.

The Engineers at KS&P Ltd have works on a diverse range of infrastructure projects.

Some of the design services KS&P Ltd offers includes:

- Drainage and Retention Structures
- Slope Stabilisation Works inclusive of Retaining Structures
- Road Pavement

SERVICES

PROJECT MANAGEMENT

KS&P Ltd has its genesis in engineering; the art of creation and problem solving. With over four decades of professional practice in the industry, KS&P Ltd offers its amalgamated understanding in the form of Project Management Services and Systems for Construction Projects keeping constant focus on the key factors ensuring a project's success.

This is done by creating a professional, collaborative environment and implementing management systems which efficiently automate the important features of a project, so all members are clear and accountable regarding their responsibilities. KS&P's Project Management Team provides all the tools to ensure this is achieved.
